*** VERY IMPORTANT**

- (1) Samples will be received between 8:30 and 10:00 am, from Monday to Friday. In particular cases, upon prior notice, samples can be accepted outside this schedule. (2) The Service assumes that in case no studies are specified to be performed by the applicant, it will be the Service responsibility to perform the studies that seem more appropriate and most safely support the suspected diagnosis, including FISH and molecular biology studies on top of the flow cytometry ones, preceded or not by cell separation. (3) The instructions for collecting and sending samples, as well as other general conditions, are included in the document "**Guide for obtaining and sending samples to the General Cytometry Service**". For more information, please visit our website.

Please contact our office for any additional clarification.
